

Food Intolerance & U

240 Food Test

Julia

"Thank you for being the key to regaining my health back after 18 years of suffering. having done the food intolerance test and found my triggers, i can finally start living again"

Dr Nasr and his team helped me identify that I was intolerant to eggs, cow's milk dairy and gluten. Since my elimination I feel great. Thank you!

1.Your Gut & U

Good Health Starts With The Gut

You've heard the age old saying that 'all disease begins in the gut'. Well, the food you eat and the lifestyle you lead has a profound impact on the state of your gut and importantly, its subsequent response to that food.

Generally speaking, foods are not normally harmful to us. However, in the presence of a compromised gut, the body treats harmless food protein as if it were harmful.

In such circumstances, the body uses the immune system to fight against these proteins, creating an inflammatory response.

It is this inflammatory response that can result in a variety of symptoms and signs.

If you are suffering from any of the following symptoms you may have food intolerances

Throat

Geographic Tongue – Hoarseness Itchy Palate Swollen Tonsils Sore Throat Throat Swelling _

Cardiovascular

Heart Arrhythmias -Irregular Heartbeat

Gastrointestinal

Abdominal Pain -Bloating Crohn's Disease Celiac Disease Irritable Bowel Weight Gain / Obesity Burping Flatulence Constipation -

Skin

Eczema – Swelling Dry/Cracked Skin Skin Rashes Weeping –

The Facts

Affects up to 45% of the population

<u>ເ</u>

Age

Can develop at any age

Symptoms

Can be between 2 hours and 72 hours

Cause

IgG is the most common antibody present in blood and other bodily fluids. It protects you against infections and any foreign proteins

Neurological

ADHD Behavioral Problems Chronic Fatigue Depression Forgetfulness Insomnia Migraines

IGG4 TEST RESULTS

In this section you will find several tables visualizing your test results. After the first table, giving an overview about the number and class distribution of positive and negative tests for all food allergens, you will get an overview of the food group clusters and the result distribution for every group.

At least, there is a detailed list of every single test result, divided into food groups.

Overview: Strenght of Reaction

Strength of Reaction	Total Reactions
Class 5 & 6: strong reaction	0
Class 3 & 4: stronger moderate reaction	1
Class 1 & 2: low moderate reaction	8
Class 0: no reaction	231
not tested:	0
Total Tested	240 / 240

The strength of your reaction is shown on a scale from class 0 to class 6.

Overview: Group Results

Group	No Reaction	Weak Reaction	Moderate Reaction	Strong Reaction
